

NEW USE OF POWER TECHNOLOGY

In March I put together the one and only beginning to tell the facts of this detailed story. I ran an edition of it and put each copy along with my resume into specified envelopes for mailing. I wanted to send my story to various news agencies, publishing houses, magazines and other appropriate investigative parties whom I thought might be interested in helping me by at least attempting to get the word out. I stamped about forty-five to fifty of these packages and proceeded to mail them one day. A couple of different U.S. Mail Trucks tracked me around and waited for each letter drop. One older style mail truck vehicle had been repainted white and was driven by a black female about in her thirties. Another more official looking vehicle had the decals and markings of the U.S. Postal Service and was driven by a middle aged Caucasian man.

I believe most of those packages never were delivered to the intended recipients. I resorted to e-mail and faxes. I have received no replies except one sympathetic e-mail. Therefore, I conclude that my incoming mail is being intercepted or that my story is so appalling, no one wants to get involved.

Following three and one half years of ongoing, progressive surveillance and continuous phone taps, wherever I am, police and their agents know intimate details of my lifestyle and of my thought processes. They are clear in the picture of my intelligence and stamina. They have searched every file and document pertaining to my history, work records and medical files. They have decided that I am expendable. I pray to God for ongoing assistance. Beware of falsely generated documents bearing my name and signature. I hope that my style of language and writing will clue you to the differences between a composition I have truly written and one that these enemies would put forth as mine.

MICROWAVE RADIATION TREATMENTS THAT COOK TO KILL

Across the street from the house where I live, there is a trussed hightower with three parabolic microwave dishes set at the bottom. Yagi and other antennas are mounted intermittently running to the top aside lightning rods and capped off with the red fresnel lamps that alert aircraft to its height. Less than one half mile southeast of this tower with similar metal beacons of technology, is an AT&T installation of many towers housing horns, boxes, Yagi, Parabolic and other variety of specific antennas.

On Woodlawn Cemetery Road, where I live, Bellsouth Utility Vans installed

more than seven black-vinyl-torch-shrinkwrapped mono-and-dipole fiber optic upright cylinders attached by co-axial cables, in an array onto the telephone poles of my street. These were installed during January 1998, after I was gassed and fumigated on a daily basis from my Oak Forest Apartment in Ocoee. When in July I began photographing this array of utilities, Bellsouth and Florida Power buried some, removed others, left a few and added a vertical rain gutter type cover to hide them. These are radiation generating magnetic (Faraday) waveguides which are creating an ElectroMagnetic Field aimed directly and enclosing the aluminum sided house where I, Catherine Cinelli and Owen Scott live.

Distracted by the continuous harmonics of the described radiation field, I went to Florida Hospital to have my hearing tested. My audiogram evidenced that I hear in the maximum range of the test equipment or 12,000 decibels. The audiologist called a few clinics to locate audio test equipment that would prove I hear in the radar ranges of microwave frequencies. We discovered that there is no equipment locally available to prove my ability to hear in the UHF, EHF ranges. I wrote to the local army and naval recruiting offices. They also were unable to help me find equipment to prove that I hear in the microwave ranges of ElectroMagnetic Fields.

However, according to researchers; Llaurodo, Sances, Battocletti & Thomas in Biological and Clinical Effects of LF Magnetic and EF's,

“The ability of many individuals to hear radar (microwaves) has been well documented and is generally described as a ‘buzzing like bees.’ In other examples, individuals have been forced to relocate their homes because of noise which is beyond the normally audible range. ”

This is the first of several details that I ask you to concede as I wend my way through the important facts that constitute this report.

I have been capitulated to raise my intelligence concerning technologies. I sought an understanding of high frequency antenna transmissions and fiber optics. My auditory- nervous system experiences and research led me to uncovering information about unheard of ElectroMagnetic Field weapons.

Author B. Blake Levitt in his book called Electromagnetic Fields, reveals:

“That the military has a huge stake in EMF/RF research cannot be denied. The military gathers information through wireless technologies; creates weapons that project energy fields . . . (P.13)

“Veterans of the Persian Gulf war are reporting illnesses that closely resemble Chronic Fatigue Syndrome. The disorders may have been triggered by several things including possibly electromagnetic fields used in modern weaponry as well as in some experimental weapons reportedly used for the first time.” (P.191)

“The pentagon has also known for several decades about a phenomenon called ElectroMagnetic Pulse, or EMP. EMP is a massive overdose of energy to a given area at any one time, such as a by product of a nuclear explosion, but it can be created by simple electrical means and used in a weapon.” (P. 193)

In my neighborhood, on several occasions the utilities agents were installing this malaise, assisted by sight surveyors who came around to line up the waveguide cylinders along their marks. I began to realize this was no pony operation as the number of professionals involved became revealed to my discerning eyes.

I do not know if the operators have imitation vehicles or if they are authentic employees of the various trades, moonlighting for the disguised militants whose desire it is to snuff lives. It was never curiosity that stirred me but the necessity of self-preservation.

I joined the University of Central Florida Alumni Association to access the engineering and physical sciences research stacks. I sought to comprehend the technologies by which the local police and their agencies create an ElectroMagnetic Field that rings throughout Owen Scott's aluminum sided house and through the atmosphere of the immediate residential neighborhood. I went to the UCF Library physical sciences and engineering stacks to learn how this system was mechanized by matching diagrams and technical summaries to photographs of the street apparatus'.

My explanation is based on these searches and the experiences I am having. Local Police, Bellsouth, Time Warner Cable and Florida Power Corporation have created an antenna array using the existing co-axial transmission power lines with the addition of magnetic (Faraday) cylinder-vinyl-wrapped mono-and-dipole fiber optic cable creating an antenna array and powering surveillance camera, audio and sensor equipment rigged to the house and along the street.

During the period when agents of police surreptitiously entered our house, they attached adapters which have high voltage capacitors that act as high pass filters allowing the electrical wiring of the house to act as a receive antenna that in turn radiates in the VHF, EHF frequency ranges, effectively radiating the interior of our home with (body-cooking) microwaves.

I deduce a remotely operated signal generator with the ability to amp up the power by means of installed capacitors and signal boosters on the power lines. The magnetic (Faraday) waveguides carry the boosted signals and allow them to aim the field at the electrical system of our house which is converted to receive the street antenna microwave-radiation transmission signals (noise).

Their mobile vans contain the signal processing oscilloscopes and other detection and amperage reading equipment. The street installed waveguides carry the enhanced volume and quality of the radiation they are sending as an ElectroMagnetic Field onto our house where they are causing me great physiological suffering in order to make me die.

THE CAR AS A MICROWAVE-RADIATING ANTENNA

A book called Antennas, by Evans and Britain states that "Adapters available at Radio Shack, (RS#15-1835 and RS#15-1839) allow the electrical wiring in the walls of your home or apartment to be used as a TV antenna. The electrical wires in the wall collect just about as much TV signal as a set of rabbit ears. The adapter has a high voltage capacitor that acts as a high-pass filter allowing the TV signals through to the TV set while blocking the ac voltage on the lines."

I believe this principal explains the mechanism by which the police and their agents are able to precisely track me through traffic every time I drive my car. They have installed since 1995 (the night I purchased the used vehicle) on the electrical system, a convertor to radiate microwaves as an antenna, which continues to cook me and that their RADAR equipment can track and follow whenever I drive my car

Not only this, but these militants use the same ability to convert the

electrical and the home security systems of my friends homes to microwave radiators, when I sleep over. These warriors are dread serious about not allowing me to live. I would not attempt to flee; the network of evil is apparently so large. I have faith that Good triumphs over Evil and this is the reason I report.

AN OBJECT WITH FORCE ACTING UPON IT WILL CONTINUE ALONG ITS PATH (AT REST OR) IN MOTION UNTIL ACTED UPON BY ANOTHER FORCE THAT IS EQUAL OR GREATER

These corporate infiltraters and militants will continue to murder until some powerful agent comes along to interfere with and put a stop to their procedures.

FOR EVERY FORCE OF ACTION THERE IS AN EQUAL AND OPPOSITE REACTION FORCE.

Though some may not completely comprehend it, this report is the direct reciprocal reaction force to the abuse of radiations and other poisonings which are continuing to be perpetrated against me. I believe the old cliches: 'The pen is mightier than the sword. Those who live by violence shall die by it.' I espouse the Gospel of Peace, of Brotherly Love in Jesus Christ, and in praying for the Redemption of the Souls of Mine Enemies. I die with the words of Godliness issuing upon my breath. Violence will not reach me beyond the veil which separates life and death.

STATEMENT OF MY INNOCENCE AND OF MILITANT POLICE PERSECUTION AGAINST ME IN THE FORM OF ELECTRO MAGNETIC AND ELECTRONIC WEAPONS OF OPPRESSIVE ABUSE:

I AM INNOCENT OF ALL CRIMES AGAINST THE LAWS OF THE UNITED STATES OF AMERICA AND IT'S CONSTITUTION. I REMAIN UNINVOLVED WITH MILITIA, GANGS, TREASONORS AND SEDITIONISTS. I AM NOT ANTI-THE-GOVERNMENT AND I NEVER HAVE BEEN. I DO HOWEVER DECRY EVIL MILITANTS AND THEIR ACTIVITY AGAINST ME.

I HAVE BEEN UNDER ELECTRONIC SURVEILLANCE; THE WALLS OF MY HOME ARE MICROPHONED. FIBER OPTIC CAMERAS AND SENSORS ARE MOUNTED IN THE UTILITY TRANSMISSION WIRES ALONG THE ROADS AND MY CAR IS CONTINUOUSLY TRACKED BY MICROWAVE- RADAR AND COVERT OPERATORS.

I DO NOT BELIEVE IN GANGS, MILITIA, VIGILANTEISM, OR FIGHTING FORCE WITH FORCE. I BELIEVE IN MEDIA EXPOSURE AND CONSTITUTIONAL MEANS AS THE WAY TO PUBLICLY REDUCE AND ELIMINATE THIS MENACE. THE LAWS OF OUR NATION ARE DESIGNED AGAINST THESE AUTHORITIES WHO USURP JURISDICTION WHERE THEY ARE UNENTITLED.

I HAVE NO INTENTION OF FILING SUITES WITH THE LAW OR TRYING TO BE COMPENSATED FOR THE SEVERAL MANY ITEMS AND DEGREES OF LOSSES I AM SUSTAINING. MY INTENTION IS TO WARN PEOPLE OF THIS PERIL VIA THIS WRITTEN REPORT.

THE GOD WILL ULTIMATELY WIN. I HAVE PRAYED THAT WE

WILL NOT HAVE TO WAIT FOR THE ARRIVAL OF CHRIST TO SEE
THE END TO-THIS TACTICAL MANUEVERING AGAINST THE
INNOCENT CITIZENRY. WE HAVE THE POWER OF
RIGHTEOUSNESS. COURAGE IS REQUIRED.

BEWARE OF FALSE DOCUMENTS BEARING MY NAME AS I SUSPECT
THERE ARE SOME. IF I DIE, I RETURN TO MY MAKER WITH A
CLEAR AND FREE CONSCIENCE FOR HAVING WARNED MY
FELLOW AMERICANS.

CATHERINE ANNE CINELLI
